NOTE—Contn. sheet.

G. R 8. III-2]

General and Revenue Secretariat.

Gol File No. 103 of 1918

Serial No.

I have carefully studied the work of the Geological Office in connection with the audit of that office and in addition watched the officials at work and studied the volume and quality of work to be done by them. The number of communications that were received and issued in that office during the year 1918-19 was 3735 and 3694 respectively and during the current year up to date the number is 2011 and 2071 respectively.

2. The present clerical staff of the office consists of 12 hands (11 permanent and 1 temporary The distribution of work among the 12 hands is as as follows.- The Head clerk deals with all important case-work. The next senior clerk deals with a portion of the case-work, work of explosives Branch and the Cash accounts. Another clerk deals with periodical reports and returns including statistics. Two clerks are employed in typing, 2 on registering and despatching and one is in charge of the Records. Three draftsmen (2 permanent and 1 temporary) and the Laboratory Assistant complete the clerical staff. There being no laboratory in the office at present, the Laboratory Assistant is really doing the duties of a Museum Attendant.

3. The only casework of the office is the correspondence relating to applications for mining prospecting and exploring licenses and the only

NOTE—Contn. sheet.

G. R S. III-2]

General and Revenue Secretariat.

Geol File No. 113 of 1918

Serial No.

accounts that the office has to keep are those relating to the contingent charges of the office and the recovery of royalty in respect of the current licenses. This latter portion of the work overlaps the statistical work of the office and further the amounts are remitted to the Treasury direct by the licensees, the office merely watching recovery. The number of licenses issued in each year since 1916-17 is given below :-

Details.	1916-17.	1917-18.	1918-19.	Up to date.
Mining	3	3	2	x
Prospecting	22	11	13	41
Exploring	6	7	11	7
Corundum	3	3	1	x Including renewals.
~~Explosives~~	9	7	6	

4. The licenses actually in force now are as as follows :-

Mining	29.
Prospecting	25.
Exploring	11.
Corundum	1
~~Explosives~~	-

5. The number of periodicals and returns to be dealt are not also many and the most frequent of them is the monthly return of Bar gold production which does not require much of compilation coming as as it does from highly organized companies. The levy of royalty quarterly from prospecting licensees is the only periodical work of a taxing

NOTE—Contn. sheet.

G. R. S. III-2]

General and Revenue Secretariat.

Gen'l File No. 103 of 1918

Serial No.

nature in the office.

6. The registering work of the office averages only 35 papers of all kinds (both "To" and "From") a day excluding holidays in calculating the average. The despatcher has only 18 to 20 communications of all kinds to attend to on any one day. The typists also have not more work than they can easily manage, except in the months when the annual report and accounts have to be got through

7. At present there is a great deal of excessive registry of papers in this office. The correspondence relating to applications for licenses which forms the bulk of the communications are entered in the ordinary "From" and "To" registers and a register of applications is also maintained. This duplication can well be avoided if all correspondence relating to applications are entered in the register of applications itself as is the case in connection with Darkhasts in Taluk Offices a good deal of labour incidental to abstracting and cross referencing and also to duplication of work can be avoided. This has been suggested in the audit note of the office and when it is effected, one clerk can manage both registering and despatching or in any case, the registering clerk will have ample time for other work also. From the above it will be clear that the office is by

no means undermanned, and the clerical staff of the office is ample to manage the work of the office including also the few communications received in the explosives branch. Only 132 communications were received and 137 sent out since September 191' in the explosives branch giving an average of less than two communications a day (both To and From). The continuance of the ~~explosives branch~~ arrangement in the Geological Office premises has also a different administrative aspect about which, ~~will be dealt with in a separate note.~~ I believe, the Director is separately addressing Govt.

The Explosives branch has its separate Office. M

8. One branch of the office requires however greater attention, that is, the Library and Museum. There are at present over 23,000 samples in the Museum and 2,500 volumes in the Library. A card-index catalogue of the Library is maintained but it has to be kept up to date and a printed catalogue has to be issued to enable the officers of the Department and also the Geological Section of the Central College and the public interested in Geology, to benefit more largely from the Library. A descriptive catalogue of the samples of the Museum is also a necessity. A single attendant cannot cope with both these items of work and further the training that Museum Attendant receives can hardly fit him for preparing and maintaining a catalogue, and seeing it through the Press. A whole-time clerk for doing the -

G. R S. III-2]

General and Revenue Secretariat.

Geol File No. 103 of 1918

Serial No.

scriptory and typing work in this connection, for attending to requisitions and for keeping the registers of issues etc., is necessary, if the Library and the Museum are really to serve their purposes. This official may also be in charge of the tents and camp stores.

9. Lastly the work of the drawing section requires the permanent retention of three hands, because not only does the work to be done justify the establishment but also the work is of a specialised character. It may be noted in this connection that the work of the section does not consist merely of preparing the maps and diagrams for the publications of the department but it has regular routine work of a responsible character in as much as it has to note on each application whether the area specified in it has been already granted to a mining or prospecting licensee or whether there is a prior application for the same and also to note sanctions on the topo sheets & to prepare extracts for print & issue with licenses

10. In view of the foregoing considerations, I am of the opinion that an additional clerk is necessary for duty as Librarian and Store-keeper and that the temporary draftsman should be made permanent. As regards increases of pay recommended, I consider that an increase is justified in view of the general conditions now prevailing and also in view of the responsible character of

NOTE—Contn. sheet.

Serial No.

the work expected of the casework clerks and the drawing branch. The casework, though small in volume, relates to very valuable matters and those who deal with the matters have to be kept above temptation. I consider also that in the case of small establishments like the Geological Office, where opportunities for promotions cannot be of frequent occurrence a time scale is preferable.

11. The new scale may be as follows :-

Head clerk	70-6-100	75-10-125
Clerk	50-4- 70	2.50--4- 70
Clerk	40-4- 60	40--4- 60
Clerks	30-4- 50	3.30--4- 50
1 Clerk	30-2- 40	2.30--2- 40
1 Clerk	20-2- 30	
Laboratory Attendant	20-2- 30	25--2- 35. Museum Attendant.
Head draftsman.	55-5- 80	75-10-125.
1 Draftsman	35	40--4- 60.
1 do (temporary)	30	30--4- 50 Permanent.
12 hands (11 permanent and 1 temporary)		13 hands.

Total cost 578¾

Total cost 752½

Extra cost 173¾ h.n.

12. I have not dealt with the menial staff as the additional number (10) to be sanctioned has been settled in the Government Order No 9. 17692-9 Eco : 1037/18-1992-2-20. That number may now be made permanent and the pay of each peon may be raised by one rupee in addition to grain compensation and war allowances.

13. I have not also dealt with the Mines Branch. No increase in clerical staff is asked

scale proposed by ...eth gives too high ...o from the Deputy ... to the Head clerk. ...varam agrees to the ...sal made by me.

MYSORE GEOLOGICAL DEPARTMENT

W.2152 Enl: nil Bangalore 5th April 1920

Dear Sir,

With reference to the Note, dated 26th March 1920, by Mr. A.V. Ramanathan, Efficiency Audit Officer, on the subject of the revision of the clerical and menial staff of this Department, a copy of which he has kindly sent to me for information, I enclose herewith a Note containing my views on the observations made by the said officer.

May I request you to kindly place my Note before the Government and obtain their orders in the matter at an early date.

Yours sincerely,

B. Rangaraja Iyer

Sent with my marginal remarks on another Copy 17-4-20

To

The Hon'ble Mr. S. Balasundaram Iyer, Esq., B.A.,
Chief Secretary to the Government of
H.H. the Maharaja of Mysore, Bangalore.

Note on the observations of the Efficiency Audit Officer in the matter of the revision of the clerical and menial staff of the Geological Department.

Reference :-

Para 3.

Besides the correspondence relating to applications for mineral licenses and leases, which no doubt forms the major portion of the bulk of case work, several other questions which come under the class of case work are also dealt with, such as the reservation of minerals and mineral areas for purposes of Departmental investigations, the transfer or assignments of leases and licenses, the revision of rates of royalty on minerals from time to time, the revision of the rules for the grant of licenses and leases from time to time in the light of the experience gained in respect of the working of the existing rules, the fees leviable on account of survey and demarcation of prospecting and mining blocks, etc. These latter are of a much more important nature than the ordinary case work connected with applications for licenses and leases and require long and careful study. A certain amount of case work of a responsible nature has also to be done in connection with the budget estimates of mining revenue, the funds required from time to time for re-appropriation from sanctioned budget grants and certain other account matters. The importance of the case work done in connection with the progress of operations carried on

There, ~~are not exceptions~~ are not matters of frequent occurrence and such cases that may not be more 4 or 5 in any one year
BDD
17-4-20

Yes and also occasional
BDD
17-4-20

The budget is an annual affair & reappropriations are occasional matters
BDD
17-4-20

On the other hand, I have urged that this one of a responsible Character

under mineral licenses and leases cannot also be underestimated in view of the fact that it is very necessary that the fulfilment of the terms of the licenses and leases should be properly watched and the best possible benefits derived by Government from the operations carried on thereunder.

Besides the accounts relating to the contingent charges of the office and the recovery of royalty in respect of current licenses, the recovery of rent and local dess on mining blocks has also to be watched and timely action taken in cases of arrears. There are also cases of refunds of fees, deposits and rents to be dealt with and as many as ten Account Registers are required to be maintained in respect of mineral licenses and leases. The maintenance of the latter throws heavy responsibility on the Accountant and occupies a decent portion of his time.

Left Comm., I have taken a comml-gall these. These ~~form~~ comprise the major account of ~~the~~ work of the office

The overlapping of work in connection with the royalty accounts is only to an insignificantly small extent, but has the advantage of serving as a means of check of one account with another.

This was referred to not as an item diminishing the other work of the office but as a factor not adding to the other work of the office

The system of direct remittances of royalty to the Treasuries does in no way diminish the work of this office. The demand is made by this office and not only is the recovery watched but due steps are taken against the defaulters under the terms of the mining leases and prospecting licenses.

If all these and various other sundry matters should be promptly and satisfactorily dealt with, there is more than ample work for three good case-workers. There are of course a few items of work which require only little time, but there can be no doubt that on the whole all the items of case-work taken together would occupy the full time of at least three intelligent clerks.

Para 5.

That is why I have acquiesced in a Statistical Clerk. The number is large but as indicated herein, only a few are of a taxing nature. BVD 17-4-20.

I fail to see how the 25 yearly progress report on 25 schemes can be taxing work for the Statistical Clerk BVD 17-4-20

With regard to the periodical reports and returns, it may be noted that the number of these dealt with is 81, and there are certain of them which require careful study and preparation, e.g. quarterly reports of progress of work done under the scheme of the re-organization of the Department, half yearly reports of progress of organization and development schemes, annual statistics of mineral production and labour employed in connection therewith. The collection of materials necessary for these reports and statistics and the preparation of notes, including items of doubts and discrepancies involve a great amount of intelligent work.

Para 6.

With regard to the Typists, it may be noted that one of them is a Steno-typist and that he does not only short-hand writing (including transcription), but also the typing of the more important communications. It is only for one or two months in the year, during the field season, that the Typists will have only as much work to do as they can easily manage, but during other times or when any one of them

is absent on leave and especially after the field season, when in addition to the Annual Administration Report and accounts, the technical reports of the several Field Officers, the reports and notes for the technical publications of the Department, the Dasara Report, the annual reports for the Mysore Economic Conference, etc., are to be typed, the need for a third Typist has been acutely felt. If work is to be done more expeditiously, it is important that an additional Typist should be provided on the temporary establishment for at least six months from June to December.

The extra clerk I have recommended for the Library & Stores can be utilised on, when necessary Bro 17-4-20

Para 7.

The main object kept in view in registering papers in this office is to have an accurate record of all communications received and issued. This helps us to ascertain with certainty whether any given communication has or has not reached or left the office. The duplication of work caused by the maintenance of the register of applications is insignificant and there would be no appreciable saving of labour by transferring the entries from the "From" and "To" registers to the register of applications for leases and licenses without an abstract of the kind written in the "From" and "To" registers. On the other hand, there is some disadvantage to be apprehended by excluding communications relating to applications for leases and licenses from the "From" and "To" registers. For example, a communication received from an applicant submitting a revised sketch of a mining block is passed on to

I do not agree.
Bro
17-4-20.

the

the Head Clerk with the file and the Head Clerk is, for some good reason, unable to deal with the file for some time, the register of applications cannot show that the communication has been received at all and it is not until we refer to the file that it can be ascertained that the communication has been received. The register of applications would in such a case, be misleading. If the communication is noted in the "From" register, it can readily be ascertained that it has been received. In the absence of its entry in the "From" register there would be absolutely no means of tracing its receipt in the event of its being lost or mislaid before it is entered in the register of applications. To guard against such possible contingencies, it appears desirable that the present system of registering all communications in the "From" and "To" registers should be continued.

Why should it not? By my suggestion on adoption, the receipt of the receipt sketch will be first noted in the Application Register under the appropriate application & then the paper handed over to the Head clerk. BDD 17-4-20

With regard to the suggestion that all correspondence relating to applications may be entered in the register of applications, I quit agree that this may be done as it would help us to know readily from the register the exact stage of each application and serve as a means of check against delays in the disposal of the applications.

Then what becomes of the objection raised in the last paragraph. BDD

The foregoing facts clearly explain that three clerks are absolutely necessary for the case work of all the branches, that no diminution of work can be anticipated in the registering branch and that there is need for

a third Typist for six months in the year.

The existing staff can manage the work with an additional hand on the permanent scale for Library and Stores work and a temporary Typist for six months in the year.

This is the appointment wanted by the Director of Archaeology. The staff recommended by me I think considers that the work can be managed by entrusting one Library & Stores Clerk, when necessary He will have to be a typist as well, as the Cataloguing of books & specimens will involve much typing

Para 11.

BM 17-4-26

The scale suggested by the Audit Officer is suitable excepting that it requires modification in one or two respects, viz,- (1) that we require 4 Clerks instead of 2 on Rs.50-4-70 for the following reasons, with a personal allowance of Rs.10/- to one of them, a corresponding reduction being made in the number of Clerks in the grade of Rs.30-4-50, viz,- from 3 to 1, and (2) that the maximum pay of the Head Draughtsman should be Rs.150/- instead of Rs.125/- in view of the intelligent, responsible and high class work done by him. In fact, the services of the present Head Draughtsman, Mr. B.A. Joshi, are absolutely indispensable and it is not possible to replace a man of his experience, ability and artistic taste even if we promised a more attractive grade than what has been proposed. I would, therefore, press his claims very strongly and request the Government to consider the case favourably.

I acquiesce in the proposal 75-10-125-25/2-150.

BM 17-4-26

In the existing staff there is already at ~~present~~ the Accountant (Mr.B.Srinivasa Iyengar) in the grade of Rs.50-4-70, and the Steno-Typist (Mr.C.V.Venkatachelum Naidu) who is at present in the grade of Rs.40-4-60 and who has been turning out excellent work, has to be put in the grade of Rs.50-4-70 in order to give him sufficient encouragement and remuneration for his technical

He will continue with

BM 17-4-26

~~Similar~~ He must await his turn for promotion. A reorganisation cannot be ~~ordered~~ to suit personal requirements.

BM 17-4-26

technical qualifications and capabilities.

Besides the Head Clerk who does case work of major importance and for whom a grade of Rs.75-10-125 has been accepted by the Audit Officer, the Accountant and the Statistical Clerk also do case work of ordinary and routine importance. The Statistical Clerk (Mr. T. Venkoba Rao) does very intelligent case work and it is necessary that he should also be given a grade of Rs.50-4-70

Maybe - But he must abide his chance for promotion as Head Clerk, the Record Clerk is better than him have it at once. HM 17-4-20

The Records Clerk has also very heavy, responsible and intelligent work to do and it would not be fair to put him on a grade of less than Rs.50-4-70.

His ordinary work is not heavy. I have suggested some special work for him in connection with weeding out records & if he is entrusted with it, he may be given a bonus on its completion or a temporary allowance HM 17-4-20

It would be difficult to get capable officials even on this grade and as the present incumbents have been working very satisfactorily and the conditions of living have become very expensive, I request that their case may also be considered favourably.

This argument is not relevant here. It will be taken into consideration as a general question by Govt & these Officials will get the same relief as those of other Depts get HM 17-4-20

The present Accountant (Mr. B.Srinivasa Iyengar) who is already in the grade of Rs.50-4-70 may kindly be granted a personal allowance of Rs.10/- per mensem, in view of the fact that he is already in that grade and that it is not feasible to put him in a higher grade even in case the post of the Head Clerk should fall temporarily or permanently vacant.

But what is his pay in that grade? Further personal allowance is not admissible for such reasons HM 17-4-20

Mr. Venkoba Rao who is at present the Statistical Clerk in the grade of Rs.30-4-50 has been showing great promise in handling important

subjects

subjects with great intelligence and accuracy. He is the only clerk capable of doing and filling the Head Clerk's post and as such deserves to be put in the grade of Rs.50-4-70. The Deputy Clerk post proposed in the re-organization scheme was intended for him.

So, he has his future matebreight for him. Why make a special pleading now? Boo 17-4-22

This is precisely the wrong way to propose a reorganisation Boo 17-4-22

The revised scale, which I consider to be absolutely necessary, is as follows :--

1 Head Clerk	on Rs.	75-10-125.
4 Clerks	on "	50- 4- 70 (plus a personal al-
1 Clerk	on "	40- 4- 60. lowance of Rs.10/-
1 Clerk	on "	30- 4- 50. to one of them.)
2 Clerks	on "	30- 2- 40.
1 Museum Attendant	on Rs.	25- 2- 35.
1 Head Draughtsman	on "	75-10-150.
1 Draughtsmen	on "	40- 4- 60.
1	on "	30- 4- 50.

Excepting in the Joshi Case, I am unable to revise my views which were formed after a careful study of the work of the office in situ and detailed discussion with the Director

Para 12. Boo 17-4-22

With regard to the menial staff, I am agreeable to the suggestion contained in the Audit Officer's Note, namely, that the additional peons sanctioned may be made permanent and that a uniform rate of increase of Re.1/- per man may be granted in addition to the grain compensation and war allowances.

NOTE—Contn. sheet.

Final Note by the First Member of Council.

Subject:—

Proposals for the re-organization of the clerical and menial establishment of the Department of Mines and Geology.

The Director of Mines and Geology was requested in March 1919 to submit proposals for the revision of the clerical and menial establishments of the Department in consonance with the proposals made by him in January 1919 for the revision of the staff of Gazetted Officers.

The Director accordingly submitted two alternative proposals - one providing progressive salaries and the other fixed salaries and stated that he was in favour of the former proposals being approved.

His recommendations are

i) that, in the interests of efficiency, the pay of the clerks and menials ought to be raised as proposed by him &

ii) that, owing to increase of work, the establishment of the Geological Department might be increased by two additional clerks, 7 peons and 6 lascars and of the Mines and Explosives Department by one clerk, 5 peons and 4 lascars.

These proposals were scrutinised by the Under Secretary in charge of the Efficiency Audit Branch under instructions from the Chief Secretary with a view to find out the necessity for the number of hands and scale of pay proposed with reference to volume of business done and his recommendations are contained in pages 4 to 10 of the notes in the file.

The Director of Geology was given an opportunity to meet the observations made by the Efficiency Audit Officer and his views on the subject are contained in a note placed in the file.

When the papers came up before me, I recorded the following minute on 30th March 1920:-

"In view of the proposals for some relief to all low paid subordinates, there is no justification for a general rise in the scale of pay.

I agree to an additional clerk as Librarian and Store Keeper on Rs. 30/-. The other draughtsman may be made permanent".

The other Members of Council are agreeable to my proposal and I solicit His Highness' gracious approval to the same.

MEMBER OF COUNCIL.

CHIEF SECRETARIAT IV MINOR Depts. 17 APR 1919

To

C.S. Balasundaram Iyer, Esq., B.A.,
Chief Secretary to the Government
of H.H. the Maharaja of Mysore,
Bangalore

Dated } 15th april 1919.
Despatched }
Received 16 AM 19 April 1919
General No. 3036 Gen

Enclosure No. Two

Sir,

In compliance with your letter No.G.20988, dated 20th March 1919, I have the honor to forward herewith for favourable consideration and orders of Government, two alternative statements A and B containing my proposals for the revision of the clerical and menial staff of (1) the Geological Section and (2) the Mines and Explosives Section of the Department of Mines and Geology.

2. Statement A includes provision of progressive salaries for the clerical staff as well as for the Draftsmen, and statement B includes provision of fixed salaries for the clerical staff and progressive salaries for the Draftsmen. I would

would strongly advocate the adoption of statement A, although the provision of progressive salaries for ministerial appointments is opposed to the principles enunciated by Mr. A.L. Datta and laid down in Government Order No.Fl.6772-Ad/3.F.154-16-2, dated 24th April 1917. With due deference to any reasons Mr. Datta might have had for advocating the system of only fixed rates of pay in lieu of progressive salaries for ministerial appointments, I am strongly of opinion that the system of progressive salaries has many advantages and is more suitable than the system of fixed rates of pay in the case of a small office where vacancies are few and far between and chances of transfer are practically non-existent. The adoption of the latter system compels us to grant at once lumpsum increases to the officials and the former enables us to distribute the same for a period of 5 or more years. It would, in many cases, be undesirable that the lumpsum increment should be granted to an official at once, but at the same time it would be unfair to cut down the ultimate amount to a smaller figure. On the other hand, a progressive scale of pay admits of the grant of a small increment at the outset rising annually to a certain maximum. As the existing scale for the clerks contains progressive salaries, it would also be difficult to properly adjust the salaries of certain clerks so as to satisfactorily suit the fixed scale unless they are allowed under the revised scale of fixed pay the maximum pay of their present posts. Statement B containing proposals for fixed scale of pay to the clerical establishment is, however, submitted as an alternative in case Government deem it imperative that the system of progressive salaries should be altogether done away with.

3. The statements have been drawn up after careful consideration of the requirements of the two Sections concerned and in consonance with the proposals submitted with my letter

No.

No.1854, dated 13th January 1919, for the revision of the staf of Gazetted Officers.

4. Since the last re-organization of this Department in 1915, there has been a large increase in the normal work of thi office as well as in the office of the Chief Inspector of Mines owing to the transfer of the Geological Secretariat, the introduction of the Office Manual, the revised system of account procedure and numerous reports and returns to be submitted to Government, the Mysore Economic Conference, the Industries and Commerce Committees and other bodies. The expansion of activities in connection with the development of mineral industries, etc., has also considerably increased the volume of business in this office. Prior to the reorganization of the Department, the work of the offices was not being subjected to such scrutiny and supervision as are now prescribed, nor was there then any Office Manual or any periodical inspection. Work is now to be carried on on more systematic lines and it is very essential, therefore, that the efficiency of the clerical staff of both the offices should be improved and definite responsibility attached to each official in respect of the several items of work to be done. During my recent inspection of the office, I found that all the requirements of Government were not being attended to and that it would be impossible to exact their fulfilment without additional staff. In the interests of efficiency of work it is very necessary that greater encouragement should be offered to the efforts of qualified clerks and draftsmen and that we should, thus, be able to attract capable men to enter service in the Department with the confidence that by so doing their advantages are not inferior to those entering other Departments of Government.

For these reasons, the present scale requires to be strengthened and revised as indicated in the proposition statements referred to above.

5. The main items of the proposed revision are :-

(1) The addition of two clerks (i.e., i. a Statistical Clerk, ii. a Librarian and Stores Clerk for the Geological Section, and an Explosives Clerk for the Mining and Explosives Section.

These additional clerks are absolutely necessary to carry on the work.

(2) The confirmation of the 3rd Draftsman in the Geological Section who is now on temporary establishment.

We have trained several men from time to time who when trained have left us for permanent posts elsewhere. We are pressed for Draftsmen and cannot afford to lose men who have been trained. The men must be made permanent and given sufficient pay to retain their services.

(3) The addition of 7 peons and 6 Lascars for the Geological Section and 5 Peons and 4 Lascars for the Mining and Explosives Section.

The additional peons and lascars are necessary for the enlarged staff.

(4) Revision of pay of the existing Clerks, Draftsmen, Museum Assistant and Mining Attendant so as to provide better encouragement to deserving hands.

In addition to what I have said above as to the necessity for some better paid clerical posts, I wish to make a special recommendation about our Head Draftsman. He is not only a highly skilled Draftsman, but his experience and knowledge of Geological map-work is invaluable. In addition he has very responsible duties in connection with the issue of all leases and licenses and the decision as to whether areas applied for are free or whether there are overlapping claims, as well as the preparation of the maps, rests essentially with Mr. B.A. Joshi. He is not drawing the pay which his services warrant and which he could get elsewhere without difficulty.

We

We cannot afford to lose his services and must offer him not less than I have now proposed.

I must also add a word for the Mining Attendant on the Kolar Field. He is a most useful official both as general interpreter and from his long experience of underground work and of the various classes of workers employed and their ways. His duties are arduous and important and I have long been anxious to secure some promotion for him to which he is fully entitled.

(5) Raising the pay of the menial establishment owing to the increased cost of living, the growing demand for menial labour and the higher rates of wages that are now being paid therefor.

The need for increased pay will, I think, be admitted without question. We are short of peons and lascars and practically without Section Cutters for the simple reason that satisfactory men will not join, or if they join will not continue at work, for the rates of pay which we at present offer. The cutting of the mileage allowances in Camp has made matters worse and it is practically impossible to get men who are of any use for carrying on work.

6. With these observations, I solicit kind sanction of Government to the revision of the establishment as proposed in Statement A or B, preferably the former.

I am also sending copies of the Proposition Statements, in duplicate, to the Comptroller for verification and transmission to you.

I have the honor to be,
Sir,
Your most obedient servant,

Director,
Department of Mines and Geology.

OFFICE OF THE COMPTROLLER TO THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

Dated, Bangalore, the 10 ~~XXX~~ . May 1919.

69308

20042

FROM

M. N. KRISHNA RAO, ESQ., B.A.,
Comptroller to the Government of
His Highness the Maharaja of Mysore.

To

C. S. Balasundaram Iyer....., ESQ., B.A.,
Chief *Secretary to the Government of Mysore,*
Bangalore ~~Department~~.

SIR,

I have the honour to forward herewith duly verified the Proposition Statement in duplicate relating to the revision of Establishment of the Geological Section and the Mines and Explosives Sections of the Department of Mines and Geology which was received with letter No.3037 dated the 15th April 1919 from the Director of Mines and Geology.

The additional charges relating to the Geological Section are --- debitable to the group 'Civil Administration' and according to the draft Budget Estimates for 1919-20, there is no margin for any further expenditure under that group. The charges relating to the Mines and Explosives Section go to the head 'Supervision of Mines' and will result in reducing the net Mining Revenue. The effect of this reduction will be a proportionate reduction in the share of Revenue allotted to the several groups of Departments.

I have the honour to be,
Sir,
Your most obedient servant,

Comptroller.

Serial No. 12

Proceedings of the Government of His Highness the Maharaja of **Mysore.**

Read—

Govt order no G7 12888-89/Geol 6-15-8 dated 15th March 1916 sanctioning the re-organisation of the permanent clerical and menial establishment of the dept of Mines & Geology.

2 Correspondence ending with letter no 3036 dated 15th April 1919 from the Director dept of Mines & Geology submitting proposals for the re-organisation of the clerical & menial establishment of the dept.

3 Paragraph 9 of Govt order no G7 7041-7100/Geol 69-18-11 dated 18th Sept 1919 ~~Order Thereon—No.~~ sanctioning the re-organisation of the dept of Mines & Geology & stating that separate orders will issue in regard the re-organisation of the subordinate and menial staff of the department consequent on the arrangements sanctioned

Govt order no Cs 243-4/Geol 103-18-9 dated 6th July 1920 sanctioning the continuance of the services of the third draughtsman in the office of the Director, Dept of Geology on a pay of Rs 30/- p.m. pending orders on the proposals for the revision of establishments referred to above.

Order no 4189 93

In view of the allowances sanctioned in Govt order no PC 449-98/S&A 23-20 dated 19th July 1920 to afford some relief to all low paid subordinates, Govt consider that there is no necessity for a general ~~rise~~ increase in the scale of pay of the clerks & menials of the depts of Mines & Geology & are therefore not prepared to sanction the proposals submitted by the Director in this behalf. They also consider that there is no necessity for the increase of the clerical & menial establishment of the two Departments to the extent proposed by the Director. They are however pleased to sanction the appointment of an additional clerk as Librarian & Store keeper on Rs 30/- p.m. & direct that the third draughtsman referred to in the order of 6-7-20 read above be made permanent on a pay of Rs 30/- p.m. The extra cost involved will be met from the lumpsum provision made in the Budget.
